BLACK SEA RAID

Composed and Conducted by **TERRY PLUMERI**
Intrada Signature Edition ISE 1043

Intrada's latest Signature Edition release features Terry Plumeri's action-military score to the 1999 feature *Black Sea Raid* (known on DVD as *Special Forces*). For this score, Plumeri needed music which would convey the Russian military element as well as that of the covert mental state of the leading character. He also needed a theme which possessed the flexibility that would allow a unified transformation from the tension filled mind of a CIA agent to his developing love interest in the beautiful Russian scientist. Recorded with crystal clarity by The Russian State Symphony Orchestra, the orchestra successfully translated Plumeri's sonic architecture into this dramatic, action-packed score.

In *Black Sea Raid*, Covert CIA agent Rick Halsey (Daniel Bernhardt) assembles a team of close friends and former special forces operatives to rescue a Russian nuclear scientist (Marina Mogilevskaja) held in a mental institution. After the team rescues her, she joins them in their search for a stolen nuclear missile before it is sold on the black market. Their ensuing journey is a series of intense conflicts with the Russian military as well as Chechen terrorists—on land, sea and air—in a desperate struggle to prevent an international crisis.

As a bonus, this CD features "Dusk," the second movement from Plumeri's concert piece, "Two Poems for Dance." One of Plumeri's favorite compositions from a harmonic point of view, "Dusk" was his first complete composition. Although the original instrumentation was that of two violins, viola, cello and double bass, Plumeri was quite confident that the piece would work very well with a full-sized string orchestra and was recorded as such at the end of the *Black Sea Raid* recording sessions.

Intrada's premiere release is mastered from the original session masters and features the complete score.

This Intrada Signature Edition is limited to 1000 units.
